

# JayB's Sound Set for **YAMAHA** S80, S30, CS6x and CS6R

## Installation Guide

---

Thank you for choosing my sound set for the great S80/CS6 series by Yamaha. The sound set was originally created on a Yamaha S80 and is 100% compatible to S30 and about 90% compatible to CS6x and CS6R.

The file **JayB\_S80.zip** you've downloaded from my website contains three files:

- |                     |  |
|---------------------|--|
| <b>JAYB_S80.S2V</b> | This is the sound bank promoted on my website for trance and house music in S80/S30 native format.   |
| <b>JAYB_CS6.S2V</b> | This is the same as above with modifications especially for the CS6x/CS6R. It misses two piano patches. And contains the default CS6x INT bank.  |
| <b>JAYB_GM.S2V</b>  | This is my optimized version of a General MIDI (GM) compatible sound bank. It is based on the GM bank that was around on the web for some time but has better volume equalisation, better ethnic sounds and some Roland D50 rebuilds. It is made for the S80/S30 and might not work on the CS6x. |

## Installation

I strongly recommend using a Smart Media card (3.3 V, max. 64 MB) in combination with this sound bank. Use a USB card reader or the S80/CS6x Card Filter to transfer one or both files to any directory on the Smart Media card.

After booting the synth press on [CARD] and go to the "Load" page. Select "all-voice" under "Type" and on the right side find the S2V file you want to load, e.g. JAYB\_S80.S2V. Press [ENTER].

```
Load)   Type   File
Card    all-voice >001:[JAYB_S80.S2V]
```

**ATTENTION:** All data in the INT and EXT bank will be overwritten. If you have stored custom voices in these banks, backup them or

## About the drum kits

The drum kits "Dynamic Kit", "R'n'B Kit" and "Dance Kit" use a few normal voices. These behave weirdly and depend on the last voice patch you selected before you select the drum kit. For this purpose there's the patch 128 "DrsPreLoad". Select this before using the drum kits and everything will sound as intended.

# Voice List (S80 version)
